INTRODUCTION

Overview

These office files, which constitute the heart of the administrative record of the Kennedy White House, should provide researchers with valuable insights into the tone and mission of that brief administration. From Richard Neustadt's pre-election concern (expressed as early as September 15, 1960) about the expectations the public had since Roosevelt's time about the "first hundred days"—an impression, Neustadt noted, that "feeds on reality" and cannot be "sustained by mere 'public relations' "—to the administration's belated battle for civil rights legislation, the sense of conflict between idealism and reality becomes unmistakable.

These papers also offer insights into Kennedy's administrative style. He cared little for the minutiae of day-to-day routines, preferring to operate on a direct person-to-person level. His collegial manner ("He was the center of the wheel," Walt Rostow recalled; "he was capable [of maintaining] more reliable, bilateral human relations than any man I have ever known.") worked best with small groups. He used the cabinet sparingly, minimizing full and extended meetings and considered his department heads useful if they were informative; if not, he was easily bored.

Typically, matters requiring resolution were directed to more than one person, which gave the president more freedom to pick and choose, a process that subordinated rank to the president's interest, temperament, and need to know. Even when making some crucial diplomatic decisions, as during the Cuban Missile Crisis, such trusted aides as Theodore Sorensen were more influential than Kennedy's secretary of state.

To the everlasting frustration of researchers into the inner workings of the Kennedy presidency, it is a safe assumption that some of the most important exchanges were never committed to paper and were often transacted over the telephone with whomever happened to be Kennedy's most vital source for that particular need—and sometimes only because he happened to be *the person* who was in the right place at the right time.

Kennedy, the first president born in this century, was also the first whose use of modern technology left important gaps in the written record. Researchers will accordingly also want to make use of the Kennedy Library's extensive oral history collection.¹ Whatever the need, however, the office files constitute a logical place to start.

Through the years since the institutionalization of the Executive Office after the recommendations of the Brownlow Committee in the New Deal era, the number of personnel in the office has varied considerably, ranging from fewer than a dozen to well over six hundred. Just between Truman's time and Eisenhower's, the staff nearly doubled. One temptation has been to attribute such growth to the creation of an "imperial" presidency, but the reasons are more complex and have little to do with any particular president. Since Franklin Delano Roosevelt's time, there has been an increased need for communications with and oversight of a greater number of federal agencies as well as communications with members of Congress and the public. Growth of government has also been accompanied by needs arising from modern communications technology and even the complexities of the presidential primary system that have emerged in more recent years. Changing conditions, often beyond the control of any individual president, determined the size of the staff. Compared with his successors, the Kennedy operation was small. Interestingly, the president accepted the advice of

¹ Many oral histories are available on microfilm or microfiche, published by University Publications of America (UPA) in its collection *The John F. Kennedy Presidential Oral History Collection*. Part I is *The White House and Executive Departments* and Part II is *The Congress, the Judiciary, Public Figures, and Private Individuals*.

Clark Clifford that "the staff should consist of no more persons than can conveniently have succession on a day-to-day basis." Sorensen's office, for example, worked with only two assistants to handle a variety of matters, politics, speeches, messages, action programs, et cetera.

Sorensen's role also tells us much about Kennedy's personal approach to the presidency. Although he has since denied that he functioned as a chief of staff, insisting that the president himself took care of that job, the formal roles were often blurred. Much of the Kennedy approach to problems, such as his establishment of a special executive committee to deal with the missiles in Cuba, was ad hoc. Several writers have made the point that Kennedy used his White House staff as "emergency repair crews."

These files, which were maintained by his personal secretary, Evelyn Lincoln, therefore were primarily designed to serve the president's immediate needs rather than the research requirements of future historians. Documents often appear under different categories, and duplicates can be found in files organized not only according to chronology, but also by subject matter or under the names of members of the staff. Occasionally, one will even find information that has been classified in one category inexplicably appearing in another. This sort of contradiction should come as no surprise.

Part 1

The collection, one of the eight major groups of files constituting the Kennedy White House papers, is reproduced here according to the five categories that have been somewhat reorganized by government archivists. They vary in length and emphasis. *Part 1* of the microform edition of the office files, consisting of special correspondence, speeches, and legislative and press conference memoranda, does offer some additional interest. Here is where researchers can get some sense of the Kennedy world through his contacts with such individuals as Pablo Casals, Robert Frost, Pope Paul VI and Pope John XXIII, Eleanor Roosevelt, Herbert Hoover, Harry Truman, Dwight Eisenhower, and Winston Churchill. Their letters, in fact, constitute an elite section of correspondence that differs from the working materials of the great body of the collection.

Ceremonial and polite as most of them are, the letters nevertheless reveal much about the Kennedy style. Casals appears somewhat overwhelmed and grateful. His invitation to play the cello at the White House meant that the president chose the artist despite an FBI check that showed his hostility to American cold war policies.

Part 2

The staff memoranda file is especially valuable for substantive material. Papers from the files of Larry O'Brien, who headed the legislative liaisons team, as well as from Charles Horsky, Mike Manatos, and Charles V. Daly offer fascinating glimpses into the White House's relationships with Capitol Hill. Some individual documents are especially revealing. Take, for example, papers from the O'Brien file that document the care given to maintaining records of favors requested and granted for certain senators and congressmen. Six single-spaced pages detail reasons for the obligation of Congressman William J. Green, Jr. of Philadelphia, to the White House. Included in this remarkable compilation are the dates and numbers of the congressman's constituents who, presumably at the request of the congressman's office, were extended the courtesy of special White House tours. Such trivia is enumerated together with specific information on the millions of dollars of federal contracts that corporations in his district received from the federal government. Presumably nothing was too insignificant to be omitted, and the implicit message discernible from a simple reading between the lines was that such lists were valuable tools when it came time to call in the "I-owe-yous" when the White House needed the votes of Green and his colleagues on Capitol Hill.

All in all, the O'Brien files are essential. Collectively, the papers from the legislative liaison chief and other members of his staff are supplemented by a number of other useful papers, all providing an overview of the administration's contacts with Congress. These naturally cover virtually every subject imaginable. Several reflect the frustration of dealing with Ways and Means Chairman Wayne Hays, who, in these papers, emerges as at least as great an obstacle as some of the most intransigent Republicans. They also provide insights into such specific issues as distressed areas legislation, taxes and civil rights, trade legislation, patronage, foreign aid, redistricting, and the problems of the aged.

A memorandum from the chairman of the Council of Economics to the president on December 16, 1962, will sound familiar to those who have followed the "supply-side" economic arguments during the Reagan presidency. There, at that early date, the Keynesian economist Walter W. Heller presented the case for a tax cut as a stimulant over the kind of increased public sector spending favored by such liberals as John Kenneth Galbraith. In words made more familiar by conservatives in later years, Heller summed up his case by arguing that "a vigorous economy, stimulated by tax cuts, will provide a broader economic base and an atmosphere of prosperity and flushness in which government programs can vie much more successfully for their fair share of a bigger pie." In a discussion with Heller on August 15, 1962, Kennedy agreed that action on taxes "was our hottest domestic issue." After Kennedy stated his case before the Economics Club of New York on December 14, 1962, he telephoned Heller and said, "I gave them straight Keynes and Heller, and they loved it." Sorensen later remarked that "it sounded like Hoover, but it was actually Heller." Galbraith, by then the ambassador to India, wrote to Kennedy from New Delhi that "you gave the tax-cutters enough support to qualify as the most Keynesian head of state in history. Do put a picture of the Master in your bathroom or some other suitable secluded place."

Moreover, the Heller papers, when used in conjunction with documents from the Sorensen and Galbraith files, enable the researcher to trace the administration's efforts to placate angry businessmen after the vigorous efforts in the spring of 1962 to halt attempted increases in the price of steel. Kennedy's Democratic government, by thwarting the operation of the market, had confirmed the preconceived fears of most industrialists. The White House then set out to repair the damage in a campaign to make amends with businessmen and, subsequently, to enlist their support for the forthcoming fiscal policies. A particularly useful statement of the administration's determination appears in Sorensen's memo of June 20, 1962.

Of additional interest are some political and diplomatic items. Chester Bowles, who opposed the administration's "acceptance" of the Bay of Pigs mission from the Eisenhower planners, continued to serve as the House dove. Contending with the quandary of how to respond to the obdurate Diem regime in South Vietnam, on March 7, 1963, the normally expansive Bowles contributed his views on how to break the impasse. The Bowles memorandum came after the mission to Southeast Asia by Michael Forrestal and Roger Hilsman. Their report—with its expressed misgivings about the concentration of power in the hands of Diem and his family, together with Bowles's anxieties—anticipated by a matter of weeks the more vigorous repression of Buddhist opponents by the government. The Kennedy administration's failure to extricate itself from the region quickly proved to be disastrous.

Gradually, the difficulty of continuing to back Diem became more apparent. Choosing a military solution instead of trying to liquidate the U.S. involvement, Kennedy agreed to allow Diem to be overthrown by opposing generals. That was exactly what happened in early November, but the revolt went beyond Kennedy's gamble. Just three weeks before the American president left for Dallas, Diem was arrested, removed from power, and then killed. The result was a new period of instability in South Vietnam, with a rapid succession of different governments, and precisely what Bowles and the other doves feared—a deepened American responsibility for the outcome of the war.

Researchers should, in this connection, not ignore the informed memo from Myer Feldman that is also available here. Writing at a moment of irresolution in Vietnam, and following Kennedy's open endorsement of the civil rights movement and Limited Nuclear Test Ban Agreement with the Soviet Union, Feldman trained a wary eye on resurgent right-wing groups within the United States. The differing views of the world as seen by such influential individuals as W. W. Rostow and Jerome Weisner are essential for an understanding of the predicament faced by the president in what turned out to be his final days.

Part 3

The third subdivision under the heading of Departments and Agencies provides further in-depth understanding of how the administration responded to some of the key issues mentioned above. Here, more than in the staff files of individuals, can be found further documentation about such economic concerns as balance-of-payments and fiscal policy. The more detailed papers of the Council of Economic Advisors supplement the views of such departments and agencies as the Bureau of the Budget and the departments of Commerce; Health, Education, and Welfare; Interior;

and Treasury. Heller and his associates, James Tobin and Kermit Gordon, worked to "educate" the president about economics.

Edward Flash's study of the council, *Economic Advice and Presidential Leadership* (1965), concluded that Heller led "a strong Council composed generally of very able, well-led, aggressive, amazingly hard-working, and productive professionals." Under Heller's driving force, it became "a round-the-clock scout on the New Frontier." Still, a closer look at fiscal decision making during the administration's first six months, especially the handling of the decision not to request an income tax surcharge as part of the mobilization for what was regarded as the coming showdown over Berlin, suggests otherwise. For all the advice given by the council, the Kennedy administration responded through its own perceptions of what was politically possible, and the president himself never departed from his characteristic caution. As noted in a July 26, 1962, memorandum for the files by Gardner Ackley, Tobin's replacement on the council, after discussions on the question of a tax cut, "once again, the balance of payments is the key to everything else."

The wide ground covered by papers in this part of the files suggests that the same careful, deliberate approach applied across the board. Not only did balance-of-payments continue to be a preoccupation right to the end (and a factor predictably crucial during later years), as shown, for example, by Secretary Luther Hodge's memo to the president of April 19, 1963, but researchers will find a similar tone when reading memoranda from Dean Rusk on the resumption of nuclear testing, Sorensen on candidates for Supreme Court appointments, and David Bell's preliminary recommendations on the 1964 budget.

Part 4

Still, the best examples of the cautious approach to controversial issues by an administration that was launched with promises about a dynamic New Frontier remain to be found in the Subjects File, which serves as a useful introduction to a number of areas. Brought together are various publications of the Democratic National Committee, including press releases and weekly reports. Since there is no other central repository of such party documents, researchers must depend on holdings such as those at the Kennedy Library. An additional introductory source contains negotiations pertaining to the Test Ban Treaty. Of special interest to many will be the polling surveys of various states, a handy compilation for many purposes. A number of miscellaneous items constitute the rest of the collection, and, except for the reports of political attitudes, most are of greatest utility for those who will turn to other files for more extensive information.

That is also true for another important part of this category, civil rights. Certainly, researchers interested in this vital area should see the files of the Justice Department and the papers of such individuals as Robert Kennedy, Sorensen, and Myer Feldman. No other section within the President's Office Files, however, offers a similarly well-organized collection of materials dealing with the topic that has been used more than any other to illustrate the conflict between promise and performance. Other than a general chronological file covering the subject, there are also memoranda dealing with negotiations with Governors George Wallace of Alabama and Ross Barnett of Mississippi. Most revealing here is the caution shown by the White House during the March on Washington of August 28, 1963, when the president distanced himself from the rally until he saw that the event had concluded without the much-feared violence. Then he invited the leaders to the White House and appeared with them for a group photograph.

Even these papers are sufficient to convey the administration's sense of apprehension that existed from the outset about the wisdom of calling for new legislation, a strategy that was then also endorsed by such leaders as the Rev. Dr. Martin Luther King, Jr. and Roy Wilkins of the National Association for the Advancement of Colored People. Only later, as pressure mounted for Kennedy to sign an executive order banning discrimination in housing constructed with federal funds and after the obstructions presented by Wallace and Barnett, did the administration's conservative strategy seem especially inadequate. Dr. King's Birmingham campaign in 1963 aimed at desegregating that major city, but it had the secondary objective of forcing the president to offer his moral and executive leadership. Papers in this file reflect the meetings that Kennedy held with attorneys and labor and religious leaders in the days after he made his dramatic civil rights speech and call for reform legislation on June 11, 1963. From that point, having taken his position, he could only press for the early passage of his recommendations and hope to minimize the conservative backlash against him

in Congress and elsewhere, especially in the South. In this connection, researchers should consult the Sorensen papers for a memorandum of June 10, 1963, detailing the behind-the-scenes advice given by Vice President Johnson, who, even at that time, left no doubt about where he stood on the subject.

Part 5

The final selection features position papers and advisory memoranda, most generated by the State Department, but some, such as those by Arthur Schlesinger, Jr. by the White House staff itself. Essentially far from complete and largely awaiting advances in the declassification process, the papers nevertheless offer some indispensable insights into the Kennedy administration's world outlook; or, to put it another way, how policy planners then viewed geopolitics. The U.S. reply, for example, to the Soviet *aide-memoire* on Germany, which followed the Kennedy-Khrushchev meetings in Vienna, should be read in conjunction with the memo for the president from J. Patrick Coyne. This document, located in the Department and Agencies File (*Part 3*), draws on the Sprague Report, an intelligence estimate that was prepared during the last years of the Eisenhower administration. Formally entitled "Conclusions and Recommendations of the President's Committee on Information Activities Abroad," it advised that the Soviet Union was seen as pressing for "expansion and ultimate world domination," not necessarily through overt military means, because it probably prefers to avoid war, but "by the continuous employment of economic, diplomatic and informational instruments as well as of subversive and conspiratorial action." Communists in the "developed world," it went on to advise, were exploiting adverse political and economic conditions by trying to establish "front organizations of labor, youth and the like—which seeks [sic] to prevent the establishment of democratic institutions in the new states, and elsewhere to undermine already established and functioning free governmental institutions." Such warnings were particularly applicable to Asia. There, the Chinese Communists were seeking to extend their power and influence, which included an apparently successful "Hate America" campaign. Of importance for researchers is the realization that copies of the report, which was then, of course, classified, were circulated among members of the incoming Kennedy administration.

The documents in the Countries File (*Part 5*), whether pertaining to Latin America, Europe, or Southeast Asia, reflect the zenith of cold-war tensions. The briefing papers prepared for President Kennedy before he went to Paris and then on to Vienna for the meetings with the Soviet leader indicate the gravity with which the conflict was then viewed. Kennedy, who was a president who did his "homework," was prepared by the voluminous background materials from the State Department for a confrontation with a Khrushchev who was dead serious about making the Americans squirm over the sovereignty status of East Berlin. He was also determined, Kennedy read, to exploit the forces of anti-colonialism by pushing the so-called "wars of national liberation," a point he had stated forcefully in a speech delivered some three weeks before Kennedy's inauguration.

The *aide-memoire*, Khrushchev's "greeting" to Kennedy at the outset of the talks, foreshadowed the somber climate of their discussions. It was uncompromising in its condemnation of the West for the rebuilding of German military power and confirmation that West Berlin was, as Khrushchev had earlier put it, a "bone" in his throat. He wanted, instead, a free, demilitarized city, something he had threatened to force back in 1958 when Eisenhower was still in office. A peace treaty would end occupation rights. West Berlin would become "strictly neutral" and the United States would have to deal with the German Democratic Republic (East Germany) as it would with "any sovereign state." The *aide-memoire* as a secret diplomatic document used for negotiating purposes was one thing; for it to be published and read by the world, as was subsequently done, was another.

Departing from the talks, Kennedy ominously told his Soviet counterpart that it would be a "cold winter" and returned to Washington prepared to demonstrate his resistance by mobilizing U.S. military strength, which included home-front preparations with advice to civilians to construct bomb shelters for protection against nuclear bombs. Kennedy, young and inexperienced at those first meetings with Khrushchev, underwent his first test of leadership since the Bay of Pigs fewer than two months earlier. In what was to become characteristic of his responses to crises, and very much as he behaved during the missile crisis at the end of the following year, he reacted with a combination of strength and prudence. As even he later acknowledged, provoking hysteria about air raid shelters was the one area of overkill.

During the tense summer that followed, Khrushchev implicitly demonstrated that he understood the message. Soviet and American tanks were soon placed "eyeball to eyeball" across the barriers of the divided Berlin, but not a shot was fired. Finally, on August 13, 1961, the world learned that the Soviets were constructing an enormous permanent separation of the city, the Berlin Wall. Kennedy, rather than "knock it down," as some advised, understood the severe, self-inflicted propaganda damage done by the Soviets, not least of which was the admission of failure to retain the working population of East Berlin.

Kennedy was convinced that World War III, if it ever came, would start over Berlin. He was supported by public opinion surveys that showed some three quarters of the American people agreeing that protecting the city's western sector was more important than avoiding war. Documents in the Countries File, such as those by Arthur Schlesinger, Jr. about how to handle Castro's Cuba, and those that track the difficulties with Diem in Saigon until the coup in November should be read with Berlin in mind. There was little question that Kennedy believed that American resolve was being tested in those relatively peripheral areas. He had to hold on until the message was clear.

When viewed in their entirety, then, this portion of the Kennedy record contains materials that provide invaluable insights into the deliberations of key players on a wide variety of subjects. The coverage alone reveals the preoccupations of those thousand days: balance of payments; Vietnam; Cuba; tax policy; press relations; politics, regional and national; civil rights; the space program; presidential transition; Berlin; political extremism; foreign aid; defense; nuclear testing; relations with business; Latin America and the Alliance for Progress; and the Middle East.

Users should understand that the papers fail to provide the sense of intimacy that one might expect to find when dealing with someone as charismatic as John F. Kennedy. Memoranda with his initials are relatively rare, and even those are often brief and impersonal.

Researchers should also be alerted to the ongoing declassification of documents, which will result in further access to both the Kennedy Office Files and the Kennedy National Security Files.² Together, these collections, which are located at the Kennedy Library in Boston, comprise a treasure trove for studying the Kennedy presidency.

Herbert S. Parmet
Distinguished Professor of History
The City University of New York

² UPA publishes a separate microfilm series, *The John F. Kennedy National Security Files*, that contains White House files on national security, international relations, and the affairs of U.S. allies and adversaries worldwide.

SCOPE AND CONTENT NOTE

UPA's micropublication, *President John F. Kennedy's Office Files, 1961–1963*, is drawn from the President's Office Files at the John F. Kennedy Library. The President's Office Files constitutes one of the eight major groupings of files in the Presidential Papers of John F. Kennedy. The others include White House Central Files, White House Classified Files, White House Name Files, White House Chronological Files, White House Overflow Files, White House Social Files, and National Security Files. The President's Office Files were originally a set of working files compiled and maintained by President Kennedy's personal secretary, Evelyn Lincoln. These files were kept in Mrs. Lincoln's office, just outside the White House Oval Office, and were available for President Kennedy's immediate use. They reflect the various daily activities, formulation and execution of policies, and crises affecting the president and his administration.

The President's Office Files are divided into twelve series. These series include: Staff Memoranda File; Subjects File; Countries File; Departments and Agencies File; Legislative, Speech, Press Conference, and Special Correspondence Files; General Correspondence; Personal Secretary's Files; "Special Events through the Years"; and White House Signal Agency. The General Correspondence, Personal Secretary's Files, "Special Events through the Years", and White House Signal Agency series have not been included in this micropublication. The series in this part of *President John F. Kennedy's Office Files, 1961–1963*, is described below.

Part 4: Subjects File of President John F. Kennedy's Office Files, 1961–1963

The Subjects File Series was created by the staff at the Kennedy Library out of several small original series that did not belong in any of the other well-defined series in the President's Office Files. Three of the largest groupings of files, originally separate series, are on civil rights, the Democratic National Committee, and polls. Additional files were transferred to the Subjects File Series from the "Special Topics" series, the "Daily Reports" series, and from a large and varied group of "Miscellaneous" series. The resulting series includes files relating to non-government and quasi-government organizations, such as patriotic societies; states and territories; foreign relations and policy issues, such as disarmament, the [Belgrade] Non-Aligned Nations Conference, NATO, and the UN; and domestic social and political issues, such as civil rights, the Democratic National Committee, federal-state relations, senior citizens, and political attitude polls. There is also a significant number of files on the various political trips by the president at home and abroad (i.e., Paris in 1961, Costa Rica in 1963, and (West) Germany in 1963). The Subjects File Series consists primarily of correspondence and reports. A small portion of the documents in this series are position papers, public opinion mail, and press items. The folders in this combined series are arranged alphabetically by topic. The material in each folder is arranged in chronological order.

SOURCE AND EDITORIAL NOTE

The documents reproduced in this publication are donated historical materials from the Presidential Papers of John F. Kennedy in the custody of the John F. Kennedy Library, a unit of the National Archives and Records Administration. The donors have dedicated their literary rights to the public.

UPA's *President John F. Kennedy's Office Files, 1961–1963* consists of selected series from the President's Office Files and has been published in five distinct parts. They are: Part 1: Special Correspondence, Speech, Legislative, and Press Conference Files; Part 2: Staff Memoranda File; Part 3: Departments and Agencies File; Part 4: Subjects File; and Part 5: Countries File. With the exception of Part 1, each part of UPA's micropublication corresponds to selected individual series within the President's Office Files. UPA has not microfilmed the following series: General Correspondence; Personal Secretary's File; "Special Events through the Years" series; and the White House Signal Agency. These series have been omitted either due to their security classification, in the case of the White House Signal Agency, or their general nature, in the cases of the General Correspondence and Personal Secretary's File, which comprise letters, greeting cards, clippings, articles, and schedules.

Part 4: Subjects File of President John F. Kennedy's Office Files, 1961–1963

Part 4: Subjects File of UPA's micropublication of the John F. Kennedy Library's Presidential Office Files has been filmed in its entirety. UPA has microfilmed all folders as they are arranged at the JFK Library. These folders are in alphabetical order by topic. The documents in each folder have been numbered by the JFK Library and are arranged in chronological order. UPA has also microfilmed the "Document Withdrawal Sheets" in each folder. The document withdrawal sheet itemizes the documents that have been removed—withdrawn—from the folder due to national security and/or privacy restrictions by the JFK Library.

ACRONYMS/INITIALISMS

The following initialisms or acronyms are used throughout this guide and are spelled out here for the convenience of the user.

AFL-CIO	American Federation of Labor–Congress of Industrial Organizations
AFP	Alliance for Progress
AID	Agency for International Development
DNC	Democratic National Committee
DRC	Democratic Republic of the Congo
FY	Fiscal Year
HEW	Department of Health, Education, and Welfare
NASA	National Aeronautics and Space Administration
NATO	North Atlantic Treaty Organization
OECD	Organization for Economic Cooperation and Development
PRC	People's Republic of China
UN	United Nations
USSR	Union of Soviet Socialist Republics
VFW	Veterans of Foreign Wars

REEL INDEX

Entries in this index refer to specific file folders within *President John F. Kennedy's Office Files, 1961-1963, Part 4: Subjects File*. These folders are grouped under the names of the topics to which the documents within are addressed. The names of these subjects are in bold type. Material in these folders is from private individuals and organizations, members of the White House staff, members of Congress, state governments, executive departments, the press, and members of foreign governments. In the interest of accessing the material, this index denotes major issues, events, actions, and policy decisions of the Kennedy administration under the heading *Major Topics*. Individuals who sent or received significant correspondence are also noted under the heading *Principal Correspondents*. The four-digit numbers on the far left represent the frame numbers at which file folders begin. The indented four-digit numbers represent the frame numbers on the microfilm at which subfiles within the folders begin. The researcher is referred to page xiii for a list of initialisms and acronyms used throughout this guide.

CORRESPONDENT INDEX

The following index is a guide to the principal correspondents found in *President John F. Kennedy's Office Files, 1961-1963, Part 4: Subjects File*. All major correspondents are included, with the exception of John F. Kennedy as virtually every folder contains correspondence to or from him. The first number following each entry indicates the reel, while the four-digit number after the colon indicates the frame number of the folder wherein material relating to the correspondent is found. Hence, 3: 0620 leads the user to Frame 0620 on Reel 3, where the pertinent file folder begins.

SUBJECT INDEX

Because of the straight alphabetical arrangement of this collection, the Subject Index does not duplicate the file folder names or subjects found in bold in the Reel Index. The user is referred to the Table of Contents for a general outline of the alphabetical folders found on each reel. Listed here are those subjects that may be found in more than one folder or under different alphabetical headings. The first number after each entry or subentry refers to the reel, while the four-digit number following the colon refers to the frame number at which a particular file folder containing information on the subject begins. Hence, 7: 0125 directs the researcher to the folder that begins at frame 0125 of reel 7. By referring to the Reel Index, which constitutes the initial segment of this guide, the researcher will find the folder title and a list of major topics arranged in the order in which the material appears on the film. All references to President Kennedy in this Subject Index are abbreviated JFK.

The researcher is referred to page xiii for a list of the initialisms and acronyms used throughout this guide.
