

1900 CENSUS SCHEDULES

T623. 1,854 rolls. Rolls 1-908.

The 1900 census schedules are arranged by state or territory and thereunder by county. In some instances the names of large cities also appear. The entries may not be in strict alphabetical order. Be sure to review the listings for the entire state or territory before placing your order.

Entries also include enumeration district numbers. If you wish to order the census schedules for a minor civil division or geographic area within a particular county or a certain ward within a given city, it is necessary for you to know the enumeration district number assigned to that place. Sometimes the schedule for a county or a city has been filmed on more than one roll, and the correct enumeration district number is needed in order to select the correct roll. Descriptions of census enumeration districts for the 1900 census are reproduced on the 10 rolls of microfilm publication T1210.
